

# The Art of Civil Engineering and Architecture made in Baden-Württemberg

Teheran · Iran · September 4<sup>th</sup>, 2016

# Foreword.

*Dr. Nicole Hoffmeister-Kraut MdB*

Germany enjoys an excellent reputation as a successful export nation. The federal state of Baden-Württemberg is proud of its role as a major contributor to this success story. During the past year, companies within Baden-Württemberg achieved record exports of 181.4 billion Euros.

Large globally recognised companies, such as Daimler, Porsche, Bosch, Zeiss and SAP, determine the status of our economy and our success with regard to exports as well as numerous small and medium-sized companies. Their ideas and innovations make a decisive contribution to the international competitiveness of Baden-Württemberg.

Nowhere else in Europe do companies invest more in research and the development of innovative products than in Baden-Württemberg. In addition, nowhere else is it possible to find so many active cluster initiatives and industry-specific networks, which additionally boost the innovative strength of the companies in the state.

The international success of our clusters and technology enterprises is, however, not taken for granted. Using this knowledge, the federal state of Baden-Württemberg and the companies are doing everything in their power to continually expand this leading international position in all forward-looking areas of industry. We want to continue producing sustainable solutions and cutting-edge technology worldwide in order to help dealing with the social and ecological challenges the world is currently facing.

As you can see from this event and this brochure, we are seeking to make personal contact with you here in the Islamic Republic of Iran. Baden-Württemberg, the economic and industrial organisations, science and, above all, the companies within Baden-Württemberg are interested in long-term partnerships with your country, creating lasting perspectives for the development of joint projects.

I hereby invite you to take part in this dialogue with Baden-Württemberg, and I look forward to welcoming you as guests in our federal state.

*Nicole Hoffmeister-Kraut*

Dr. Nicole Hoffmeister-Kraut MdL

Minister of Economic Affairs, Labour and Housing

# Baden-Württemberg – The German Southwest: Where ideas work.

Baden-Württemberg is one of the most important economic centres in Europe, having become one of the leading investment locations on the continent. Bordering on France, Austria and Switzerland, Baden-Württemberg is situated right at the heart of Europe. Moreover, its outstanding infrastructure makes it an ideal gateway to the markets of the European Union – the world's economically strongest single market with around 500 million consumers.

In addition to internationally renowned global players such as Daimler, Bosch, SAP and Porsche, it is mainly small and medium-sized enterprises that form the backbone of our economy. In 2015, the gross domestic product generated by Baden-Württemberg companies amounted to 460 billion Euros, higher than Belgium, Sweden or Austria. What's more, our federal state is the EU's top region for innovation. When it comes to its research expenditure, amounting to 4.8 per cent of GDP (2013), Baden-Württemberg also occupies a leading position in Europe. The innovativeness of business and industry is supplemented by a dense network of universities, research institutions and transfer agencies. Many leading German institutions such as the Fraunhofer-Gesellschaft or the Max-Planck-Gesellschaft have substantially more facilities in Baden-Württemberg than in any other state in Germany.

The economic structure of our state is a mixed one. One important mainstay is the mobility sector. Apart from the automotive and aerospace industries, sustainable mobility concepts such as electro-mobility are playing an increasingly important role. Another key sector is mechanical engineering, every third machine

made in Germany originates from Baden-Württemberg. Successful companies such as Festo, Trumpf, Voith and many others were started and have flourished here. Large corporations such as SAP, IBM and Hewlett Packard represent the third main economic segment: information and communication technologies. For the health care sector, the fourth key industry, the conditions in our state are particularly auspicious. Globally important companies such as Aesculap, Paul Hartmann and Karl Storz are at home in Baden-Württemberg.

Environment technology and renewables are our drivers of future economic growth, whereby a quarter of all German environment-specific goods and services are accounted for by enterprises from Baden-Württemberg.

Over 4,000 foreign companies have already decided in favour of Baden-Württemberg. Anyone who invests in the state as a location for their company automatically profits from a growing pool of potential industrial customers, from the highly developed parts-supplier structure, from cooperation with companies that are related or in the same sector, but above all from the know-how and skills of our highly qualified workers. Our state is international, cosmopolitan and tolerant. People from 188 different countries contribute to our innovativeness and cultural charm.

For all questions relating to Baden-Württemberg as a location for science and industry, Baden-Württemberg International (bw-i) is your first point of contact. Go to [www.bw-invest.de](http://www.bw-invest.de) to find details of the opportunities for cooperation and investment that abound in Baden-Württemberg!

# One region. 1000 strengths.

<b>Area</b>	35,741 km <sup>2</sup> – approx. 10 % of Germany
<b>Inhabitants</b>	10.7 million – approx. 13 % of Germany

Ines Banhardt, International Economic Cooperation and Location Marketing

Anna Krywalski, International Economic Cooperation and Location Marketing

### Baden-Württemberg International – your partner on the path to global success.

Baden-Württemberg International (bw-i) is the competence centre of the State of Baden-Württemberg (Germany) for the internationalisation of business, science and research. bw-i lends support to domestic and foreign companies, research institutions and universities, clusters and networks as well as regions and municipalities as first point-of-contact in all questions relating to internationalisation.

Unrivalled in Germany and a clear unique selling point for bw-i is that this state enterprise not only supports mid-sized company business by developing foreign markets and making the economic location of Baden-Württemberg known worldwide, it is also commissioned with university and research marketing.

About 60 employees with comprehensive experience in foreign markets and international project management work at the headquarters in the state capital of Stuttgart. In addition, bw-i is represented by its own overseas branch office in Nanjing, China.

When settling in a new region, foreign companies are confronted with a broad range of questions and challenges. Baden-Württemberg International supports these companies in overcoming obstacles easily, rapidly and competently.

Our support service for foreign companies not only includes providing general information about Baden-Württemberg as a business and scientific centre, but also specific data about the economy and population as well as information on general legal conditions and social insurance.

*Baden-Württemberg International lends support to domestic and foreign companies, research institutions and universities, clusters and networks by serving as the central first point-of-contact in all questions relating to internationalisation. Jürgen Oswald*

bw-i also supports foreign companies in their search for suitable business and research partners as well as appropriate company sites. We are also helpful in organising site inspections, always on location in close collaboration with the regional and local business promotion agencies.

Administrative procedures such as those relating to regulatory or statutory approval processes often become difficult challenges for foreign companies interested in settling in the area. Baden-Württemberg International is the right point-of-contact for such questions in this case as well.

Apart from our own services, we also provide information about interesting offers from other players active in the economic development sector, technologyoriented specialist institutions as well as regional cluster initiatives and networks that work state-wide. We will gladly mediate contacts to these relevant groups.

## The Baden-Württemberg Chamber of Engineers

Zellerstr. 26  
 70180 Stuttgart, Germany  
 Phone +49 711 64971-0  
 Email [sander@ingbw.de](mailto:sander@ingbw.de)  
 Web [www.ingbw.de](http://www.ingbw.de)

### Participants

Prof. Dr.-Ing. Stephan Engelsmann, President  
 Daniel Sander M.A., CEO  
 Karoline von Graevenitz M.A., Spokeswoman

The Baden-Württemberg Chamber of Engineers (INGBW) is the official representative body of engineers of all areas of specialisation in Baden-Württemberg. It was established in 1990 due to a law as a public body. The chamber of engineers is required by law to ensure the rules of professional conduct are upheld for their members and to protect the professional title of “consulting engineer” which is the equivalent of a quality seal.

Our main objectives are:

- Represent the interests of engineers on a political level as official contact partner
- Secure and promote the profession particularly the professional title “consulting engineer” for the protection of the public and the environment
- Provide advice and support for authorities and courts by means of surveys and reports
- Record members and their services in specialist lists to provide an overview of available services for investors, building clients, authorities and other potential clients
- Promote professional training and further training of engineers

The chamber’s members cover various areas of work ranging from building construction and civil engineering to surveying and transportation engineering as well as environmental protection. The majority of the members work in the building industry. The Baden-Württemberg Chamber of Engineers currently oversees 17 different specialist fields:

- Civil engineering
- Transport engineering
- Structural design and engineering
- Sanitary environmental engineering

- Building services engineering
- Building physics
- Geotechnics / earthworks and foundation engineering
- Plant construction
- Construction management / building trade
- Bioengineering
- Chemical engineering
- Electrical engineering
- Energy management
- Town planning / landscape conservation
- Environmental technology
- Surveying
- Landscape ecology and planning

Representatives:

**Prof. Dr.-Ing. Stephan Engelsmann**

**President of the Baden-Württemberg Chamber of Engineers**

Position: Managing partner of ENGELSMANN PETERS GmbH Consulting Engineers, Professor for Structural Design and Structural Engineering at Stuttgart State Academy of Art and Design

Specialisms: Structural Design and Engineering, Consultancy

Specialist areas: Design of concrete and steel structures, design of membrane and shell structures, bridge design, special structures, building envelopes and glass facades, industrial facilities, restoration and rehabilitation, product development and engineering, competition management and juror activity

**Daniel Sander M.A.**

**CEO of the Baden-Württemberg Chamber of Engineers**

Education: University degree in politics and law

Work experience: press relations officer for two politicians in Baden-Württemberg, head of a representative's office

**Karoline von Graevenitz M.A.**

**Spokeswoman of the Baden-Württemberg Chamber of Engineers**

Education: University degree in history and law

Work experience: long time practice in journalism and press relations

### Architects in Germany

Today, more than 130,000 architects in Germany are active in the building and construction business. With their enrolment in the official list of architects they commit themselves to comply with strict principles of trade. This list is kept by the 16 Architects' Chambers in the federal states.

The Chamber in Baden-Württemberg is organized as a tripartite System (state-, district- and municipal level). At present the Baden-Württemberg Chamber has 25,000 Architects as members; by means of their membership in one of the 42 Chamber Groups over 600 architects provide their knowledge and experience for the honorary based work. Architects may belong to one or several disciplines which are: Architects (building construction), interior designers, landscape architects and town planners.

**For their members** the Baden-Württemberg Architects' Chamber is a place of self-governance which is a democratically constituted statutory professional body and competent authority. Via the chamber the architectural profession can implement an own code of conduct, take part in political decision making and participate in the development of laws and regulations. The chamber provides information and consultancy on all questions of the professional practice. The extensive old age provision is assured by the professional pension fund. In order to remain competitive the chamber defines for their members certain aims of qualification and education and accompanies the young architects during their two years of practical experience. Vocational regulations are established and members are monitored for compliance with their professional duties; the chamber promotes the life-long further training and self-improvement with an own institute. With awarded competitions and events the chamber provides appropriate platforms for the architects to present their work.

**For the client and the public interest** the enrolment in the list of architects is affiliated with the protection of the job title: Only such persons may trade under the job titles "architect", "interior designer", "landscape architect" or "town planner", which have been enrolled into the list of architects of a federal state. The chamber makes clear the relevance of "Baukultur". It is essential to create an environment perceived as liveable.

## AMP Parking Holding GmbH

Offered services / product range

Dipl.-Ing. Sirous Dousti, Head of Repair and Protection  
Department for Car Parking

13

Germany, Netherlands, Belgium, Italy, Turkey, Russia, Algeria

AMP Parking Holding is an international acting architect and engineering company and specialized in the design of multi-storey car parks more than 50 years ago. More than 70,000 parking places in numerous awarded projects have been realized on the basis of our special design philosophy that considers matters of user-friendliness as well as the rules of economy.

Many of our projects received national and international honors. The underground car park Central Bus Station in Freiburg was awarded as best new car park of Europe in 1994 by the European Parking Association. Four other projects reached the final of this ambitious competition until in 2005 the car park Engelenschanze in Münster won the competition again.

The most important quality criteria of our car parks such as

- Sophisticated architecture
- Column-free parking aisles
- Angle parking
- One-way traffic
- Generous overview
- Sustainable structure

contribute essentially to the user-friendliness and boost the attractiveness and therefore the profitability of a car park.
